📍 Pune, India

## Professional Summary

Motivated BTech Computer Science student with a solid foundation in web development and software development, with a strong interest in building user-centric digital solutions.

## Education

### BTech in Computer Science

MIT Academy Of Engineering

2022 -2026

- CGPA: 7.38/ 10.0

## Technical Skills

**Languages:** Python, C++, JavaScript

**Web:** HTML, CSS, React.js, Node.js, Express, REST APIs

**Databases:** MySQL, MongoDB

**Tools:** Git, GitHub, VS Code, Vercel

## Projects

### Cyber Threat detection using XGBoost

**Technologies:** Python, Scapy

- Developed a real-time DoS attack detection system using Scapy and machine learning. The system analyzes live network traffic, identifies malicious activity with high accuracy, and displays attacker IPs with real-time alerts and visual dashboards.

### Web Project [<https://www.sarusaerospace.in/>]

**Technologies:** React.js, Tailwind css

- this is the website development project from satus aerospace Pvt Ltd

### Web Screper [Etherwise]

**Technologies:** Python, react.js, Tailwind css, Ollama

- Built an Ollama-based AI web scraping assistant at Etherwise that detects website types, generates scraping scripts from user prompts, executes them on the same platform, and displays structured results in real time.

### Ground Control Station [Sarus Aerospace Pvt.Ltd]

**Technologies:** Python, MAVLink, react.js, tailwind css

- Developed a hardware-software integrated drone system to collect and process real-time telemetry data, including live location, speed, and directional information. The project focuses on reliable data acquisition, monitoring, and visualization for effective drone operation and control.

## Learning Management System

**Technologies:** react.js, tailwind css, javascript, node js, express.js, mongodb

- Developed a full-stack Learning Management System for coaching classes to manage courses, students, and instructors.
- Implemented user authentication, role-based access (admin, instructor, student), and secure session handling.
- Designed responsive and modern UI using React.js and Tailwind CSS for an improved learning experience.
- Built RESTful APIs using Node.js and Express.js for course management, enrollment, and content delivery.

## Experience & Internships

---

### Software Development Intern

#### IJBridge

- Contributed to the development of **Job Sakura**, a job portal application.
- Implemented UI features, integrated APIs, and fixed bugs in a collaborative agile environment.

### Software Developer Intern

#### Etherwise

- Built and optimized responsive web interfaces using React.js and modern CSS frameworks.
- Enhanced UI/UX performance and.

### Frontend Developer

#### Sarus Aerospace

- Developed and deployed a modern, responsive aerospace product website using React.js and Tailwind CSS.
- Implemented interactive UI components and smooth animations to improve user engagement.
- Contributed to the development of a **Ground Control Station (GCS)** web interface for drone systems.
- Designed real-time dashboards and status visualization components for the GCS platform.

## Certifications

---

- Web Development — Internshala
- Privacy and Security in Online Social Media -NPTEL
- AI-ML Virtual internship - India Edu Program
- Introduction to Networks - CISCO

## Achievements

---

- CAVISTA Hackathon Finalist — Healthcare App
