ABOUT ME

B.Tech Computer Engineering graduate passionate about building impactful software solutions. Skilled in full-stack development, AI/ML, cybersecurity, and drone systems. Eager to solve real-world problems and continuously expand technical expertise.

TECHNICAL SKILLS

🔧 Languages

Python, JavaScript, SQL

🌐 Web Technologies

HTML, CSS, JavaScript, Tailwind CSS, React.js, Node.js, Express.js, REST APIs, FastAPI

🗄️ Databases

MySQL, MongoDB

🛠️ Tools & Platforms

Git, GitHub, Vercel, Power BI, Postman, Docker, VS Code

💡 Technical Domains

AI/ML, Cybersecurity, Web Development, Data Visualization

💡 Other Skills

Communication, teamwork, problem-solving, adaptability, time management

EDUCATION

B.Tech in Computer Engineering

MIT Academy of Engineering, Pune
2022 – 2026 | CGPA: 7.55 / 10

CERTIFICATIONS

- AWS Certified Cloud Practitioner (AWS)
- Introduction to Networks — Cisco Networking Academy
- Privacy and Security in Online Social Media – NPTEL
- AI-ML Virtual Internship — India Edu Program
- Web Development — Internshala Trainings

ACHIEVEMENTS

Participated in CAVISTA Hackathon and developed an innovative solution under strict time constraints.

PROFESSIONAL SUMMARY

B.Tech Computer Engineering graduate with hands-on experience in full-stack development, Python, SQL, Power BI, data analysis, machine learning, cybersecurity, and drone systems. Skilled in building data-driven applications, interactive dashboards, and practical software solutions for real-world problems.

PROJECTS

Cyber Threat Detection Using XGBoost

Python, Scapy, XGBoost, Data Analysis, Data Visualization

- Built a real-time DoS attack detection system using Scapy for live packet capture and XGBoost for classification.
- Achieved 94.6% detection accuracy and real-time attacker IP identification.
- Implemented automated alerts and a visualization dashboard for proactive threat detection.

🐙 [GitHub](#)

Ground Control Station (Sarus Aerospace Pvt. Ltd.)

Python, MAVLink, React.js

- Developed a real-time Ground Control Station for drone monitoring and mission control.
- Integrated the MAVLink protocol for telemetry communication and data handling.
- Built interactive dashboards for real-time status visualization and control.

🐙 [GitHub](#)

AI-Powered Web Scraper (Etherwise)

Python, Ollama, FastAPI, React.js

- Developed an LLM-driven web scraper that converts natural language prompts into executable Python scripts.
- Integrated Ollama for code generation, site classification, and live data extraction.
- Built a modern React interface to view and export structured data.

🐙 [GitHub](#)

Sarus Aerospace Website

React.js, Tailwind CSS

- Led the development of the official website for Sarus Aerospace Pvt. Ltd.
- Built a fully responsive, SEO-optimized site with modern UI/UX.
- Improved performance with optimized components and animations.

Learning Management System

MERN Stack

- Developed a full-stack LMS for coaching classes with role-based access.
- Implemented course management, enrollment, user authentication, and dashboards.
- Built RESTful APIs using Node.js, Express.js, and MongoDB.

🐙 [GitHub](#)

EXPERIENCE & INTERNSHIPS

Software Developer Intern | IJBridge

Jun 2025 – Jul 2025

- Contributed to the development of Job Sakura, a job portal application.
- Built multiple UI modules, integrated REST APIs, and fixed critical bugs.
- Worked in an Agile environment using Git, Jira, and Postman.

Software Developer | Sarus Aerospace Pvt. Ltd.

Sep 2025 – Dec 2025

- Developed and deployed an aerospace product website using React.js and Tailwind CSS.
- Built a GCS web interface for drone systems with real-time dashboards.
- Implemented interactive UI components and smooth animations.

TOOLS I USE
