📍 Pune, India

Technical Skills

Languages: Python, C++, JavaScript

Web: HTML, CSS, React.js, Node.js, Express, REST APIs

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Vercel

Projects

Cyber Threat detection using XGBoost

Technologies: Python, Scapy

- Engineered a real-time DoS attack detection system to overcome limitations of traditional log-based monitoring systems. Implemented live packet capture using Scapy and integrated supervised machine learning models to accurately classify malicious traffic. Enabled instant attacker IP identification, automated alert generation, and real-time visualization dashboards for proactive network defense..

Web Project [<https://www.sarusaerospace.in/>]

Technologies: React.js, Tailwind css

- Led the frontend development of the official website for Sarus Aerospace Pvt Ltd, addressing the need for a scalable and modern digital platform to showcase aerospace and drone products. Built a fully responsive React.js application with Tailwind CSS, optimized for performance, SEO, and cross-browser compatibility, delivering a professional industry-grade web presence.

Web Screper [Etherwise]

Technologies: Python, react.js, Tailwind css, Ollama

- Engineered an LLM-driven autonomous web scraping system that converts natural language prompts into executable Python scraper scripts. Integrated Ollama for code generation, automated website classification, and live script execution, delivering structured output through a modern React-based interface.

Ground Control Station [Sarus Aerospace Pvt.Ltd]

Technologies: Python, MAVLink, react.js, tailwind css

- Designed and developed a real-time Ground Control Station system. Integrated MAVLink protocol for reliable hardware communication, built Python-based telemetry processing pipelines, and implemented a low-latency visualization interface for mission-critical drone control and monitoring.

Learning Management System

Technologies: react.js, tailwind css, javascript, node js, express.js, mongodb

- Developed a full-stack Learning Management System for coaching classes to manage courses, students, and instructors.
- Implemented user authentication, role-based access (admin, instructor, student), and secure session handling.
- Designed responsive and modern UI using React.js and Tailwind CSS for an improved learning experience.
- Built RESTful APIs using Node.js and Express.js for course management, enrollment, and content delivery.

Experience & Internships

Software Developer Intern

IJBridge

- Contributed to the development of **Job Sakura**, a job portal application.
- Implemented UI features, integrated APIs, and fixed bugs in a collaborative agile environment.

Software Developer Intern

Etherwise

- Built and optimized responsive web interfaces using React.js and modern CSS frameworks.
- Enhanced UI/UX performance and.

software Developer

Sarus Aerospace

- Developed and deployed a modern, responsive aerospace product website using React.js and Tailwind CSS.
- Implemented interactive UI components and smooth animations to improve user engagement.
- Contributed to the development of a **Ground Control Station (GCS)** web interface for drone systems.
- Designed real-time dashboards and status visualization components for the GCS platform.

Certifications

- Web Development — Internshala
- Privacy and Security in Online Social Media -NPTEL
- AI-ML Virtual internship - India Edu Program
- Introduction to Networks - CISCO

Participation & Achievement

- CAVISTA Hackathon - Participated in the CAVISTA Hackathon, where I collaborated in a fast-paced team environment to design and develop an innovative software solution under strict time constraints. Demonstrated problem-solving skills, rapid prototyping, and effective team coordination.
